PROFILE

I started my career as a primary researcher, and research is still where my work begins. I find the gap between how founders think their brand is seen and how people actually see it, build the insight, set the design and copy direction, and scale it across every touchpoint. Over 12 years at FITTR, H&R Block, Ketto and TransPerfect Paybooks, I have repositioned brands, directed films and campaigns across TV, OTT, cinema and outdoor, built content, social and community engines, and hired the teams that run them. Along the way I have worked with **1,000+ influencers**, micro to mega, and **50+ celebrities, creators and networks**.
